

PORT BONYTHON FUEL TERMINAL PROJECT

Final Project Information Update - 11 May 2016

Upper Spencer Gulf / Whyalla's latest major development

After having carefully progressed various commissioning activities and successfully loaded out our first truck on the 5th May, we are pleased to announce that our terminal is now physically ready for commercial operations.

To commemorate this milestone, we have held a small tape cutting ceremony on the 10th May at the terminal, attended by representatives from the Whyalla Council, Regional Development Australia, iOR, Coogee Chemicals, Mitsubishi Corporation and Petro Diamond Australia (PDA).

We are very pleased and thankful that the construction and commissioning have been completed with an excellent safety record, and with significant engagement and contribution from local labour and resources.

The sales and operations team at Petro Diamond Australia now look forward to supporting the Whyalla region and South Australia with the supply of high quality diesel fuel moving forward. Please contact PDA at 08-8177-5500 for sales enquiries.

Please do not hesitate to send any other enquiries you may have to:
