

## PORT BONYTHON FUEL TERMINAL PROJECT

Project Information Update #6 - Construction update, 1 April 2016

Whyalla's latest major development

We are very pleased that the Project is at last nearing completion with terminal commissioning activities planned for the coming few weeks.

Our first ship carrying commissioning diesel is scheduled to arrive at Port Bonython around 7<sup>th</sup> April, followed by careful commissioning process to bring the terminal into operational status. We expect the commissioning will take about 4 – 6 weeks to complete.

After successful commissioning, we look forward to supporting the Whyalla region and South Australia with the supply of high quality diesel.

If you have any queries, please feel free to contact us direct.
